adornus™

We are driven to achieve perfection by our passion. At Adornus we believe that our people hold the key to our success, so we constantly pour into training, team-building, and support them like family. We have a passion for our plant, and constantly invest in state of the art equipment, elevated safety standards, and pride ourselves in our minimum waste philosophies. And when our people and our plant come together, our truest passion comes to life. Our product. We believe so deeply in the quality of our product, we offer one of the best warranties in the industry, and we stand behind it.

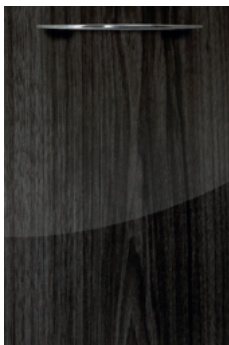

We are masters of innovation. Our main production facility in Lancaster, South Carolina was designed to handle all aspects of manufacturing, without the need to outsource key components. Unlike most cabinetry producers, we make all of our own doors, we machine all of our own box components, and handle all of our finishing under one roof. This vertical integration is what allows us to critically respond to immediate demands, and allows us to maintain quality control every step of the way.

Why Adornus?

Outstanding Value

We have developed an industry leading manufacturing process which gives us the ability minimize costly overages. This allows us to produce one of the sturdiest boxes, and the most superbly finished components available in today's market, at a price point well below other comparable products. This, combined with the centralized location of our main production plant, allows us to offer a lower embedded shipping cost, which we pass along to you.

Uniquely Accessible

Our United States based production facilities are immersed in the manufacturing of Full Access cabinetry. With this direct focus, and our vertically integrated processes, we are able to construct high quality cabinetry on demand. Our skilled craftsmen and our fully automated equipment blend together in perfect union, creating a benchmark in fabrication. It is what sets us apart, and has given us the advantage to rise to the top of our industry.
